Soppy Inc. monthly newsletter

Edition #1, May 2025, written by Daniel Gray

In this newsletter:

Dark mode on website

On SoppyInc.com, our high-esteemed website team has created a local-storage dark mode setting. When you change pages, the dark mode setting sticks. Really convenient for late mode scrolling or when you are in the dark.

Business cards

Soppy Inc. has designed- and ordered 50 business cards to promote our business. The appearance is previewed below:

Can you guess what the images belong to? Genuinely impressive! Let us know by tweeting us @soppyinccom!

PingPost

PingPost is a new project that we have started developing. PingPost will be a social media platform that is 100% with 0 ads, 0 prompts, and 0 cookies. PingPost will not be toxic whatsoever.

Our main challenge now is finding a website host for PHP and SQL. Does anybody know a cheap website host with just files that links the DNS of the domain? Please let us know!
